### **DETAILED ACTION**

1. The papers filed 02-13-04 have been received and entered. Claims 2-16 have been canceled and claim 1 is pending.

#### ***Information Disclosure Statement***

2. The information disclosure statement filed 02-13-04 has been considered.

#### ***Drawings***

3. The drawings were received on 02-13-04. These drawings are acceptable.

#### ***Specification***

4. The title of the invention does not agree with that in the declaration. A new title is required.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Jun et al. (U.S. Patent 5,412,331).

Jun et al. teach a decoder (figure 4) for driving a wordline, comprising: a latch (transistors 51, 55) set to a particular state when said wordline is to be driven; a decoding circuit (52-54) for receiving and decoding the address of said wordline and setting said latch to said particular state; and a first output inverter (100C), comprising a

pair of serially connected complementary CMOS transistors (transistors 58 and 59) for driving said wordline in response to said latch being sent to said particular state.

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kohno (U.S. Patent 6141291) and Kohno (U.S. Patent 6538955) disclose decoders for driving wordline in memory devices.
